SENG365 Assignment 2
Peer marking Information

SENG365

Ben Adams   Morgan English

28th May 2023

Overview

This document provides a quick overview of what is expected from you as you mark your peer's assignment 2 implementations. It is expected that you have read this document in it's entirety before the lab so work can get underway quickly.

Due to space requirements in labs, **you must go to the lab stream registered in your calendar.**

- Common Local Port 8080: `http://localhost:8080`
- Common Local Port 3000: `http://localhost:3000`

Quick commands

- `npm install`
- `npm run start`

1   Information

Whilst it may seem like 2 hours is plenty of time to go through 3 websites, from experience those who are not prepared and do not setup their environments correctly often end up running out of time.

1.1   Setting up your testing environment

There has been an update to the data used on the reference server, so you **must** download and use the new version, a link can be found above.

Since there will be many students running `npm install` at once over the network the operation can take a very long time (10+ minutes). To reduce this you **must** run the applications from your `/local` directory. We suggest creating a folder within `/local` to store the three applications you download.

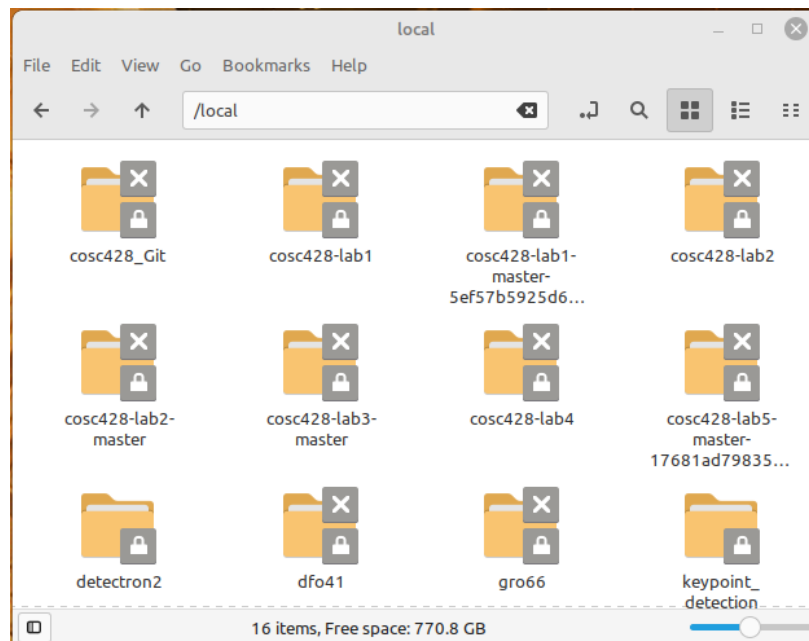

Figure 1: The local directory can be found at `/local` in your file explorer, it is likely other folders already exist within that you don't have permission to access.

1.2   Marking

Information:

- The assignments you are to mark have been listed in the **marking spreadsheet**, please find the assignments by their identifier on the **Dropbox folder** and mark them in order. Make sure to enter the identifier into the marking form.
- Please follow the steps outlined in the **Marking Form** as you mark.

Notes:

- You are expected to be objective in your marking, if you end up marking a friend or acquaintance's assignment do not artificially increase their marks. Any clear biased marking may constitute a **breach of Academic Integrity** and handled as such.
- When assessing the design and usability of the application, please try to consider and use them in their best layout (either full-screen or half screen).

1.3   Issues

Please note any issues you find as you go through the application, if you are unsure about something feel free to ask a tutor for help.

If for some reason one of the assignments you are marking does not start/work, please do not fix this by yourself and instead bring this to a tutors attention.
